How to change the name of database files

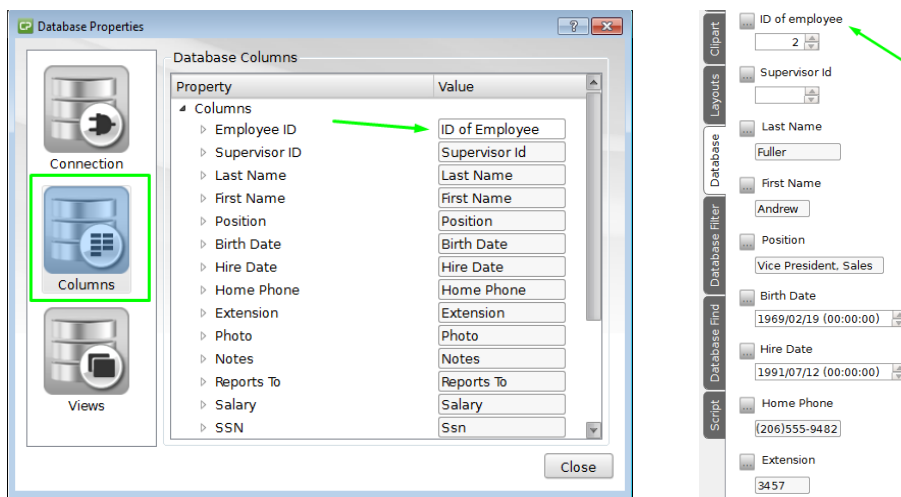

After connecting to database please go to **Database » Properties**.

A pop-up window will show. Please go to **Columns** to have access to **Database Columns**.

Changing the name in **Database Columns** will also change the name in **Database** tab. After clicking in **Close** changes will appear in **cardPresso** interface.

Please note that this changes won't change the name in **Database**, only in **cardPresso** interface.
